5 Scripts

High-converting cold email angles for front-end, full-stack, and infrastructure devs.

SCRIPT 01 • SPEED OPTIMIZATION & LOST REVENUE

📋 Copy

Subject: Quick note regarding [Company Name]'s mobile load time

Hi [First Name],

I was checking out [Company Name]'s checkout flow on mobile yesterday, and noticed that the product page takes approximately [X.X seconds] to fully render on standard 4G connections.

Google's benchmark data shows that every additional 1-second mobile delay drops conversion rates by roughly 7%. On your estimated traffic, that could be costing hundreds of lost orders each month.

I put together a quick 3-point checklist of what's slowing down your asset delivery (mostly unoptimized hero scripts and layout shifts).

Would you be open to me sending over the 2-minute breakdown? No cost or pitch—just thought

it would help your engineering team.

Best regards,

[Your Name]

[Your Portfolio Link]

SCRIPT 02 • THE BROKEN FEATURE / BUG CATCHER

 Copy

Subject: Found a small UX issue on [Page Name / Feature]

Hi [First Name],

Huge congratulations on the recent launch of [Product / Feature Name]. The UI looks remarkably clean.

While testing it out today, I ran into a minor glitch where [describe specific bug, e.g., the sign-up modal button unresponsive on Safari / mobile dropdown overflowing].

Took a quick 45-second screen recording demonstrating the exact console error and how your dev team can fix it with a 2-line CSS/JS tweak: [Loom Link].

I specialize in front-end performance and modern web builds. If you ever need an extra pair of hands to squash bugs or ship new features quickly, I'd love to support [Company Name].

Rooting for your growth!

Cheers,

[Your Name]

SCRIPT 03 • LEGACY TECH STACK MIGRATION

 Copy

Subject: Upgrading [Company Name]'s digital infrastructure

Hi [First Name],

[Company Name]'s brand identity is top-tier, but noticed your web interface is still running on an older [WordPress/PHP] build that feels slightly clunky on mobile devices.

We recently rebuilt a similar platform in [Industry] over to a modern stack ([Next.js / Tailwind / Supabase]). Result: Page speeds dropped under 0.8s, and organic search bounce rates decreased by 34%.

I drafted a quick 1-page architecture roadmap showing how your current features could be ported with zero downtime.

Worth sending over for your thoughts?

Best,
[Your Name]

Category B: No-Code & SaaS Prototyping

5 Scripts

Pitching MVPs, internal tooling, and client portals built on Bubble, FlutterFlow, and Airtable.

SCRIPT 06 • THE 48-HOUR MVP PITCH

 Copy

Subject: Building [Their Startup Idea] in 14 days without code

Hi [First Name],

Loved your post regarding [Concept / Problem they talked about on Twitter or LinkedIn]. The market opportunity is massive.

Most non-technical founders waste 6 months and \$15,000+ trying to hire agencies who over-engineer features that users never touch.

Using modern visual frameworks ([Bubble / FlutterFlow / Supabase]), we build fully functional, Stripe-integrated web and mobile apps in under 14 days for a fraction of traditional dev costs.

I took the liberty of mapping out a lean feature-architecture for your concept: [1-sentence summary or link].

Open to taking a look?

Best,
[Your Name]

SCRIPT 07 • REPLACING SPREADSHEETS WITH A CUSTOM PORTAL

 Copy

Subject: Replacing your internal spreadsheets with a custom portal

Hi [First Name],

Quick question: Is your internal team still tracking client deliverables and invoices across multiple Google Sheets?

We build custom internal client portals and dashboards on [Softr / Airtable] that give your clients real-time visibility into their project status—eliminating 90% of back-and-forth status update emails.

Built one for [Similar Client] in 5 days; their client retention rate jumped by 25%.

Happy to send over a 90-second video demo of how it works if you're interested.

Best regards,

[Your Name]

Module 4: The 1-Page High-Converting Proposal Template

 [Copy Full Proposal](#)

Never send 15-page PDF proposals. Executives approve 1-page clarity.

PROJECT PROPOSAL & SCOPE OF WORK

CLIENT: [Client Company Name]

DATE: [Date]

PREPARED BY: [Your Name / Agency Name]

PROJECT: [E.g., Custom Responsive Web Platform & Payment Gateway]

1. TARGET OBJECTIVE

Deliver a production-ready, high-converting digital platform within 21 business days to increase lead conversions by an estimated 25-30%.

2. 3-PHASE EXECUTION TIMELINE

- Phase 1: Wireframing & UX Approval (Days 1-5)
- Phase 2: Core Development & Integrations (Days 6-16)
- Phase 3: QA, Performance Audit & Deployment (Days 17-21)

3. DELIVERABLES & SCOPE

- Included: Fully responsive mobile/desktop application, Stripe/Razorpay integration, CMS setup, and 14 days of post-launch bug support.
- Revisions: 2 rounds of consolidated feedback per phase.
- Excluded: Unplanned third-party API subscription costs, features requested outside written scope.

4. INVESTMENT & PAYMENT TERMS

- Total Project Fee: [Amount: ₹XX,XXX / \$X,XXX]
- Milestone 1: 50% non-refundable deposit prior to project kick-off.

- Milestone 2: 50% upon final acceptance prior to code/DNS handover.
- Validity: This proposal is valid for 7 business days.

Module 5: Master Freelance & Agency Service Agreement

 Copy Legal Agreement

Standard legal contract template. Protects your IP, prevents scope creep, and guarantees payment.

MASTER PROFESSIONAL SERVICES AGREEMENT

This Agreement is entered into on [Date] by and between:

SERVICE PROVIDER: [Your Name / Agency Name] ("Provider")

CLIENT: [Client Company Name] ("Client")

1. SERVICES: Provider agrees to deliver the services described in the agreed Statement of Work. Additional features outside scope will require a signed Change Order at additional fees.

2. PAYMENT & DEPOSIT:

- 50% non-refundable deposit is required prior to project kick-off.
- Remaining 50% is due immediately upon final completion before release of production files or master credentials.
- Invoices unpaid after 7 calendar days incur 1.5% monthly late interest.

3. REVISIONS: Client receives up to two (2) rounds of consolidated written revisions. Failure to provide feedback within 5 business days constitutes deemed acceptance.

4. INTELLECTUAL PROPERTY: Upon receipt of FULL AND FINAL PAYMENT, all IP rights transfer to Client. Until full payment is received, Provider retains 100% ownership of all source code, designs, and assets. Client is prohibited from publishing unpaid deliverables.

5. INDEPENDENT CONTRACTOR: Provider is an independent contractor. No employer-employee relationship is created.

6. LIMITATION OF LIABILITY: Provider's total aggregate liability under this agreement shall not exceed total fees paid by Client.

IN WITNESS WHEREOF, the parties execute this Agreement:

Provider Signature: _____ Date: _____

Client Signature: _____ Date: _____
